

Join Us for a Webinar with United Way Worldwide

Using the Early Development Instrument (EDI) to inform Strengthening Families United Way Efforts

Join us January 12 from 2:00 - 3:00 PM Eastern to learn more about how Strengthening Families can support local United Way agendas. This is the final webinar in a series hosted by United Way Worldwide to share new tools for engaging local business partners in Strengthening Families. The Early Development Instrument (EDI) is a population-based measure of school readiness that includes all five areas of child development which are good predictors of adult health, education and social outcomes. EDI data helps local early childhood coalitions focus their planning and decision-making on system change vs. program change.

[Register here](#) for the webinar and find out how United Ways are using this tool in conjunction with their Strengthening Families work.
